Perfect disinfection

# Velodes® Soap

## Emulsion for hand and body washing

### Application:

Velodes® Soap is an emulsion for washing hands before surgery and after hygienic hand disinfection. It can be also used for washing hands and the whole body. The product does not contain soap so it can be used by people with allergies and intolerance to soap-based products. Thanks to skin-nourishing ingredients\*, it is particularly recommended for medical personnel susceptible to skin maceration related to frequent hand washing. The emulsion is also recommended for patients with bedsores. Dermatologically tested.

\*such as glycerine and coconut oil.

### Directions for use:

Hand washing: apply a small amount of the emulsion on wet hands and spread until it foams, then rinse with water\*\*. Washing in the shower: spread the emulsion on wet skin. Wash your body, and rinse under running water. Washing in the bath: pour the emulsion into the bath filled with water. Wash your skin and then rinse under running water.

\*\*Perform activities according to the WHO hand washing technique.
